The Board budget summaries for July and August 2014 were received and reviewed. Ms. Rosier discussed the OASIS transition and the difficulties encountered when running multiple financial reports in the new OASIS system in order to produce a single report typical of the WVFIMS reports the Board is accustomed to reviewing during a Board meeting. Additionally, Ms. Rosier reported that she will continue to work with WVOASIS personnel to develop a query that will allow for a more comprehensive report for the November meeting.

The Board discussed the Database Software contract and the current Request for Information (RFI) that is pending. Ms. Rosier indicated she will respond to the RFI upon receipt of comment and feedback by WV Purchasing Division staff regarding the Board's draft response.

A motion to approve the current expenditures and purchasing card transactions was made by Mr. Plymale, seconded by Mr. Saluja. Motion carried.

Motion carried. Mr. Armstrong will be directed to turn in all course-related expenses including travel after the successful completion of the course in late 2014.

Ms. Rosier presented the Executive Director's report and addressed all Board questions and comments.

- Ms. Rosier reported that Board members Robinson and Saluja conducted 2 PE interviews on July 30, 2014.
- Mr. Pierson asked about having a comprehensive EI list available on the Board's website. Ms. Rosier indicated this enhancement is currently being developed but will take considerable time given the limited EI information that was entered into our database prior to 2002.
- Ms. Rosier reported that 71 PE applications have been received for the October exam, 70 were approved and one has transferred to April 2015 pending receipt of additional required employment verifications. Out of the 70 approvals, 3 cancelled with the Board prior to registering with NCEES and 3 failed to register with NCEES. A total of 64 exams are scheduled to be administered in late October.
- Mr. Timms discussed the low numbers of FE CBT takers nationwide and that NCEES reported during the annual meeting that these numbers were anticipated.
- Mr. Timms discussed his interest in the Board following up on the 2009 faculty licensure survey sent to all WV colleges and universities with ABET-accredited programs. The Board agreed that it was time to contact the schools and learn of their recent efforts to comply with WV Engineering Law with respect to teaching of engineering subjects. Ms. Rosier was directed to prepare draft correspondence to the Deans of the 5 WV engineering/engineering technology programs for Board review at the November Board meeting.
- Ms. Rosier reported that she recently inquired about upcoming Fall 2014 ABET visits and whether or not the Board would have the opportunity to send an official observer. Mr. Timms is available during the October WVUIT visit dates and volunteered to participate if possible.
- Ms. Rosier reported that as of last week, there had been 90 FE CBT examinees in WV since CBT kickoff in January 2014 with a 50% pass rate (45 pass/45 fail). These numbers include both repeat examinees as well as first-time test takers.

A motion was made by Mr. Pierson, seconded by Mr. Timms, to approve attendance and travel for Board members, staff and counsel to the activities as discussed and outlined in the Executive Director's report and updated 2014 calendar. Motion carried. Ms. Hamilton informed the Board that she would be unable to attend the upcoming FARB meeting, which was previously approved by the Board.

3. Mr. Timms made a motion to move I2015-02 to complaint, seconded by Mr. Pierson. Motion carried.
4. Mr. Plymale made a motion to move I2015-03 to complaint, seconded by Mr. Timms. Motion carried.

Based on motions by Mr. Timms, each seconded by Mr. Saluja, the Board took the following actions on Special Cases for Board Action:

2. Ricky Alejo's request for comity was approved.
3. Nancy Sauer's request for comity was denied.

The Board recessed the meeting at 12:00 noon for lunch. Meeting resumed at 12:55pm.

Ms. Rosier, Mr. Pierson and Mr. Timms presented a summary on the outcome of the NCEES Annual Meeting votes that took place in mid-August in Seattle. Of particular interest was the Oklahoma board motion to remove all language from the NCEES *Model Law* and *Model Rules* that refer to Model Law Engineer 2020 or Model Law Structural Engineer 2020 and to request that the president charge a committee to draft an NCEES position statement that reflects the organization's support for additional education requirements for initial engineering licensure. The motion passed.

Ms. Rosier reported that the Board received confirmation from the NCEES Executive Director approving the Board Investigator as an Associate Member of NCEES.

Ms. Rosier reported on the latest updates regarding Subject Matter Reports released to the colleges and universities. The schedule for releasing NCEES Subject Matter Reports has changed due to the new computer-based format of the FE and FS exams. Beginning in July of this year, reports will be distributed semi-annually each July and January.

Each Board member was provided a draft copy of the proposed modifications to the legislative rules filed in March 2014, which mirror the emergency rules in effect, and each was invited to comment upon or otherwise participate in the work with legislative counsel prior to the 2015 Legislative Session. The Board also confirmed its intention to request introduction of the 2014 legislation authorizing multi-year renewals that passed both houses but did not complete legislative action.

Ms. Rosier presented the findings and agency response of the Purchasing Inspection report. Ms. Rosier also reported that both she and the Board Administrator would be

participating in the annual State Auditor's Training, which includes procurement training as well, during the remainder of this week at Snowshoe, WV.

Ms. Rosier discussed the Board's calendar of events to include the upcoming PE and SE exam. The next Board meeting was rescheduled for Monday, November 3, 2014. The meeting will take place at the Board's office in Charleston, WV.

Upon motion by Mr. Timms, seconded by Mr. Pierson, the Board meeting adjourned at 3:00pm. The Board members will be compensated one day per diem plus travel expenses.

The Board budget summaries for September and October 2014 were received and reviewed. Ms. Rosier discussed the new OASIS financial reports and explained that these reports are much more in depth and will provide a very detailed list of every transaction. The Board also discussed the Database Software contract progress. Ms. Rosier presented the WV Purchasing Division opinion regarding vendor questions. Ms. Rosier indicated that, even though progress was being made on the project, the contract time of 120 days has lapsed.

A motion to approve the current expenditures and purchasing card transactions was made by Mr. Pierson, seconded by Mr. Plymale. Motion carried.

Ms. Rosier presented the Executive Director's report and addressed all Board questions and comments.

- Ms. Rosier reported that while the volume of FE examinees has significantly decreased, the FE CBT pass rates are comparable to last year, with a 54.8% overall pass rate.
- Mr. Pierson volunteered to contact NCEES asking about a FE aggregate report for all in-state institutions.
- Ms. Rosier reported that for the October 2014 PE exam there were 71 applications received, 70 approved and one transferred to April 2015. Out of the 70 October approvals, 3 cancelled prior to registering with NCEES and 3 failed to register with NCEES, so 64 exams were ordered. There was 1 PE

This delaying of this publication will allow for the new licensee database software information to be included in the newsletter. Additionally, Mr. Timms asked if staff should do a survey on how each registrant would like to receive the newsletter (electronic or paper). - (2) 3177 COAs with extensions granted through December 31, 2015.

The Board reviewed a standard operating procedure related to the WV Freedom of Information Act (FOIA) procedures. A motion to approve the procedure as amended was made by Dr. Pierson, seconded by Mr. Plymale. Motion carried.

Ms. Rosier discussed the Board's 2015 Calendar of Events. The next Board meeting is scheduled for Tuesday July 14, 2015. The meeting will take place at the Board's office in Charleston, WV.

Upon motion by Mr. Timms, seconded by Mr. Plymale, the Board meeting adjourned at 2:50 PM. The Board members will be compensated one day per diem plus travel expenses.

The seal of the Board of Registration for Professional Engineers, State of West Virginia, is a circular emblem. It features a rope-like border. Inside the border, the text "BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS" is written in a circular path. The center of the seal contains a smaller circular seal of the State of West Virginia, which includes the date "JUNE 20 1863" and the word "TAKEN".

INSIDE
VOLUME 12
SPRING 2015

LESLEY L. ROSIER-TABOR, PE,
EXECUTIVE DIRECTOR

WE'VE HEARD YOUR MANY REQUESTS
... and have been working diligently
TO MAKE IT HAPPEN.

The Good, the Bad and the UGLY!

While not referring to the 1966 Clint Eastwood film, the name seems quite fitting in retrospect. However, there was a happy ending with a victory for the engineering community on the last day of the action-packed 2015 Legislative session, much like the gold fortune found by the bounty hunters in the notorious Spaghetti Western!

After spending many hours reviewing our current Engineering Law and discussing desired changes, counsel and staff filed the necessary paperwork to update legislative rules in 2014. The Board also decided to re-introduce the legislation that didn't become law in 2014, which was introduced in the WV Senate on February 2, 2015. The 82nd WV Legislative Session ended at midnight on Saturday, March 14, 2015. The results of our efforts were ... well, we can sum it up by saying some were good, some were bad, and some were just plain ugly.

The Good: In my soon-to-be 13 years with the WV PE Board, I am happy to report that our current Engineering Law has served us quite well. The last major update to our statute was 1992, and legislative rules in 2004, primarily to comport with NCEES Model Law. While there will always be bits and pieces that we come across from time to time and mark as possible items to have reworded, until this year we had only visited the legislature twice during my term as Executive Director. The first visit in 2004 was relatively simple and painless, with a small but important statutory change and a major re-write of the Board's legislative rules. Then, in 2013, we again went to the Legislature to get our Engineering Law into compliance with changes occurring at the national level, in particular to allow for computer-based testing by NCEES and remove references to 8-hour, paper-and-pencil exams. This effort was successful, and was timely followed up with the emergency rules currently in effect.

Because of WV's legislative rule-making process, we later filed legislative rules that incorporated the emergency rules and clarifications, such as the various types of non-practicing status that was also included in the new law passed in 2013. However, you wanted other changes, and staff did as well. West Virginia was among six states that still renewed on an annual basis. Staff also wanted to move to the calendar year, rather than the July 1 fiscal year, which provides more uniformity among the state boards. So we went back to the Legislature in 2014 requesting authorization for 2-year renewal based on the calendar year. It came close to passing, but our bill "died in the pile" on the last night of the session.

With renewed commitment, we again sought this statutory change – and also had to get legislative approval of the rules – during the 2015 session. For a rather complicated-to-explain legal reason, our proposed new rules were not authorized, but one great thing was accomplished for the licensees of the WV State Board of Registration for Professional Engineers – passage of Senate Bill 389 allowing for biennial renewal cycles on the calendar year!

The Bad: In addition to a few sleepless nights, I was forced to learn more about the legislative process than I thought I would ever need to know. Armed with a tad more knowledge than my School House Rock song days of "How A Bill Becomes A Law," we set out on what I thought would be (and in retrospect should have been) a relatively easy mission of seeing the biennial renewal cycle become a reality for our engineering community. We encountered a few hurdles and bumps along the way, resulting in no fewer than 400 refreshes of the Bill Status web page on my phone and desktop during the latter part of the 60-day session just to keep up with where we were in the process. With over 63 steps of action on our bill between February 2nd and March 14th, my knowledge has now expanded to much more than I will likely ever need again.

The Ugly: Our simple and straightforward bill submission which addressed one section of our law was expanded by legislative staff to include two other sections. It passed both houses with relative ease, and was to take effect from passage. And then it got ugly. As I sadly discovered, there are a lot of days between "completed legislative action" and a bill being signed by the Governor, which I thought was a formality. **Wrong!** SB389 was vetoed by the Governor on two separate occasions due to title technicalities spotted by his counsel's meticulous review to the House-amended bill. We needed the statute to become law so that our rules could be authorized, but with the 2nd veto there was simply not enough time in the 60-day session. Fortunately, legislative staff made the necessary minor modifications, and with the help of supportive legislators SB389 was passed a third time on the morning of the 60th day. We are so relieved. Hopefully, getting new legislative rules passed will be less fraught with problems in 2016, and staff will be less overwrought with anxiety.

Two-year renewal on the calendar year will take effect this renewal cycle, albeit alternating years for PE licenses and COAs.

Ch...Ch...Ch...Changes!

The winds of change have been gusting through the Office of the West Virginia State Board of Registration for Professional Engineers for over a year now. The howling you may hear as you stand outside the door of the Board Office might be that wind or it might just be the sound of teaching a few old dogs new tricks! Change is always a challenge to go through in any facet of life but the promise of a better, more efficient, technically savvy, user-friendly environment in the work setting usually makes it worth all the anxious, uncertain moments it takes to get there. Staff in the Board Office have been experiencing many changes at the national, state and local office level, and we are all enjoying and looking forward to many positive changes in the way that we conduct the business of professional licensure.

Nationally, our first big change last year blew in from NCEES like a refreshing gentle breeze. Moving the Fundamentals of Engineering (FE) exam from a paper and pencil test to a computer based test (CBT) was a major shift nationwide, and we had a very successful transition to CBT here in West Virginia in 2014. FE exam applicants no longer apply to our office ahead of time to sit for the exam, but rather register online directly with NCEES, and they arrange to take the exam at their convenience at a Pearson VUE testing center anywhere in the country. Only those examinees who pass the exam and want to be certified in West Virginia as an Engineer Intern apply to the WV PE Board for final approval and their certificate.

At the State level, huge changes have been underway. West Virginia began a massive undertaking with regard to the handling of all State finances, including budgeting, accounts receivable, vendor registration, procurement, accounts payable, asset management, time and leave management, benefits administration, payroll and more. Staff from our Board Office joined with other State employees from all across West Virginia for much of the summer for extensive training

on the State's new way of doing business. The wvOASIS, which stands for Our Advanced Solution with Integrated Systems, was first introduced in 2012. It is our state's new Enterprise Resource Planning (ERP) system which is a business management software that allows an organization to use a system of integrated applications to manage its business functions. This massive undertaking has been rolling out production in phases since July 1, 2014 and the winds of change from that endeavor are still gusting at full force.

One of the first procurement efforts by the WV PE Board using the new wvOASIS system was also one of the largest and most comprehensive technology investments that the Board has made in its history. In conjunction with a senior buyer from the State Purchasing Division, several licensing boards in West Virginia, including the Board of Medicine, the Board of Osteopathic Medicine, the Dental Board, the Board of Veterinary Medicine, as well as the WV PE Board, took brave new steps toward a brighter future by issuing Requests for Quotations (RFQs) for new licensure management software solutions to address technology issues and shortcomings that have been challenging staff and licensees on a regular basis for years due to older, outdated, homegrown computer databases.

With that step toward the future, our perfect storm of change blew in so quickly and with such force that our office windows are still rattling! After extensive discussion, research and review of the bids received in response to the RFQ process, Albertson Consulting, Inc. was awarded the contract to develop and implement a comprehensive new licensure management software solution using Big Picture Software for the WV PE Board. This project encompasses website enhancements, development of a content management database system and many new online services, administrative interface between the website and the database, and a cloud-based documentation program. Staff members have all been actively involved in this project

and have all been working diligently with the talented IT staff of Albertson Consulting in each of our areas of expertise, developing new on-line applications, converting data and integrating this new technology with our website and our business processes.

You, too, will begin to feel the winds of change as we move into renewal season. We are working hard to have the new system up and running for your 2015 renewal. A few of the new features you can look forward to as you renew this year: the ability to stop in the middle of your renewal at your convenience and save what you have done up to that point so you can continue your renewal later; the ability to print your PE license wallet card or COA wall certificate as soon as you complete your online renewal; and going forward we plan for you to have the ability to input your PDH hours as you obtain them so you won't have to wait to input all of your PDHs at once during your renewal. Those are just a few of the many benefits we hope to see with the new system! Other new online services that will be useful not only to our licensees but the public at large include implementation of a live, real-time, license verification search, live licensee interaction to perform address updates, roster download capability, a tracking system for disciplinary proceedings, online applications for EIT certificates, PE exam, comity, PE reinstatement, COAs and COA reinstatement with the ability for applicants to log in to see the status of their application at any time. For the first time ever, credit card payment will be the primary option for all of these new online services so credit cards will be accepted year-round and not simply during renewal season.

We've come a long, windy way in the past year! Time now for all of us to take a deep breath and explore all these new and exciting changes on the horizon as we prepare to enter our first renewal period using our new system. We hope you will like what the wind blew in!

IF WE CANNOT FIND YOU, WE CANNOT REMIND YOU!

What type of reminder works for you?

CHANGE IN STATUTE BASED ON 2015 WV LEGISLATIVE ACTION

The following outlines key changes from the recent legislative action affecting Chapter 30, Article 13 of the W.Va. Code. The title is provided in its entirety followed by excerpts with **bold type** intended to highlight the most significant changes. The full Enrolled Bill can be viewed at www.legis.state.wv.us.

Senate Bill No. 389 – *A Bill to amend and reenact §30-13-13a, §30-13-17 and §30-13-18 of the Code of West Virginia, 1931, as amended, all relating to the Board of Registration for Professional Engineers; changing time period for renewal from fiscal year to calendar year; authorizing renewal notification by mail or electronically; providing for reinstatement of nonrenewed licenses; authorizing annual or biennial renewal periods; providing a late fee; and requiring emergency rules related to renewal and reinstatement.*

§30-13-18. Renewals and reinstatement.

- (a) Certificates of registration and certificates of authorization **expire on the last day of December of the year indicated on the certificate**, and the holder of any certificate that is not timely renewed is ineligible to practice or offer to practice engineering in this state until the certificate has been reinstated in accordance with rules promulgated by the board.
- (b) Certificates may be renewed only in accordance with board rule, which **may include payment of a late fee for renewals not postmarked by December 31 of the year in which renewal is required**. The board shall notify every person or firm holding an active certificate under this article of the certificate renewal requirements at least one month prior to the renewal date. **The notice shall be made by mail or electronic means using the contact information provided to the board.**
- (d) **Effective July 1, 2015, the board may renew certificates on a biennial basis.**
- (e) **The board shall promulgate emergency rules pursuant to section fifteen, article three, chapter twenty-nine-a of this code to implement the provisions of this section.**

INVESTIGATOR'S CORNER

AARON ARMSTRONG, BOARD INVESTIGATOR

OK, probably not the best lead in to an article concerning the Rules of Professional Responsibility, but there may be a joke in there somewhere. I only mention the medical and law professions by way of example, but in reality one could insert nearly any profession to include accounting, architecture, cosmetology, pharmacy, real estate, surveying, etcetera etcetera. The fact of the matter is that most nearly all professions have some sort of Rules of Professional Responsibility (RPRs) or Code of Ethics, and all registered members of that profession are expected to live and work by those rules.

In fulfilling professional responsibilities, a professional engineer assumes various roles that require the performance of many difficult tasks on a daily basis. Not every situation which the engineer may encounter can be foreseen, but fundamental ethical principles are always present for guidance. The Code of Professional Responsibility points the way and provides the Board and society standards by which to judge the actions. In engineering, specifically in WV Engineering Law, the RPRs are found in Title 7, Series 1 of the Code of State Rules (formally cited as W. Va. Code R and available on the Secretary of State's website).

In the next few paragraphs, I shall attempt to highlight and explain a few of the RPRs and how some of these RPRs have been the basis for disciplinary action taken by the Board. As a disclaimer, though, I must admit it would be impossible to cover all of the circumstances surrounding any particular Rule of Professional Responsibility. As such, this article is merely an attempt to stimulate thinking about the RPRs and how to perform your engineering duties in accordance with the rules. Examples given are not to be taken as Board policy or precedent, as alluded to above. The Board evaluates all circumstances on a case-by-case basis.

The complete list of RPRs can be found in WV Code R §7-1-12.1 through §7-1-12.6 which are strikingly similar to NCEES Model Rule and parallel that of most other jurisdictions. The overarching theme of the RPRs is that registrants are required to be familiar with WV

Code, Rules, and all applicable laws relating to the practice of engineering. Of important note, a registrant has an Obligation to Society (§7-1-12.3), an Obligation to Employers and Clients (§7-1-12.4), and an Obligation to Other Registrants (§7-1-12.5). Since the Board's primary mission is to protect the public welfare, it only makes sense that all registrants of this Board shall be cognizant that their first and foremost responsibility is to the public welfare (§7-1-12.3(a)).

Competition is inherent in business situations, including engineering. However one may define competition, it is imperative to note that §7-1-12.2(d) states that "Registrants shall .. faithfully serve the legitimate interests of

The Code of Professional Responsibility points the way and provides the Board and society standards by which to judge the actions.

their employers, clients and customers... and they shall not compete unfairly with others." There may come a time in one's career when a project arises where an owner is soliciting engineering services from one or more engineers. To compete fairly, it is the professional responsibility of the engineer to clearly and truthfully answer the solicitation and to ask for clarification when a question about the solicitation may arise. For example, it is always better to fully understand what the owner is requesting than to assume what is being requested. Once the solicitations are reviewed, having a record of clarifications is always the safest route should the Board become aware of any potential issues. This Board has, in the past, assessed civil penalties against registrants for competing unfairly.

Among the rules regarding a registrant's Obligation to Society, §7-1-12.3(b) states that "Registrants shall approve and seal only those design documents and surveys that conform to accepted engineering standards and safeguard the life, health, property and welfare of the public." The term 'accepted engineering standards' is not meant to be interpreted as engineering that has only been proven for the past few centuries, although one could certainly argue that engineering

methodologies such as Archimedes Principle or Manning's Equation, amongst others, are genuinely accepted. For instance, there may be a circumstance where cutting edge engineering technology is surely accepted. Whatever the engineering standards may be, this rule is meant to ensure that you are only approving work that conforms to accepted engineering standards. Another way to look at this rule is to make sure the standards you are using are the 'correct' standards for the circumstance. Using the Manning's equation example above, it could be argued that Manning's equation is an accepted engineering standard, but using an incorrect Manning's coefficient as an assumption could lead to a violation of the RPRs. The RPRs are

an important part of WV Engineering Law, and many of the disciplinary actions relating to the quality of engineering are violations of RPRs.

Also included in the Obligation to Society, §7-1-12.3(h) states that "Registrants having knowledge of possible violations of any of the RPRs shall provide the Board with information and assistance necessary to the final determination of the violation." This rule is readily one of my favorite rules to discuss amongst our registrants. As the Board's Investigator, I am commonly called upon to gather information for the Board's consideration and I rely on the experts in their respective field of engineering to assist in clarifying the issues at hand. Using a previous case example, the Board was tasked to determine potential violations in a field where the Board members or staff had no specific area of expertise. To assist in the resolution of the issues, the Board relied on explanations and clarifications of engineers competent in the specific field. So if a situation similar to this arises in the future, I may call upon your expertise to assist the Board in meeting its mission of protection of the public.

Among the rules regarding a registrant's Obligation to Employers and Clients, §7-

1-12.4(e) states: "Registrants shall make full prior disclosures to their employers or clients of potential conflicts of interests or other circumstances which could influence or appear to influence their judgment or the quality of their service." This rule is meant to eliminate or make known any *potential* or *appearance* of certain factors that might influence your work. I italicize the aforementioned words for emphasis because there is usually a clear line in determining a direct conflict of interest but not always a clear line in a potential or appearance thereof. A direct conflict of interest is usually straightforward, such as an elected official requiring public contracts be diverted to a company he/she represents. A potential and appearance of a conflict of interest, however, can be somewhat obscure such as an engineer providing freelance work. Potential means 'capable of being but not yet in existence' – possible.¹ Thus, if an engineer even has a potential conflict of interest, he/she must exercise appropriate caution and properly disclose the

circumstances. While it is not the intent of this article to discuss the aspects of freelance engineering or to provide a comprehensive description of conflicting interests, I welcome you to contact the Board office with any specific questions.

The final RPR I would like to discuss is in the section on a registrant's Obligation to Other Registrants. §7-1-12.5(c), in summary, states that a registrant will not attempt to maliciously or falsely injure the professional reputation of other registrants, nor indiscriminately criticize their work. I call this the "Golden Rule" RPR -- remember the rule we were all taught as young children? Treat others as you would like to be treated. One caveat though, as this RPR contains the key words 'maliciously,' 'falsely,' and 'indiscriminately.' This can mean that a registrant may criticize works of others so long as the criticisms are based on fact or made without malice. When applying this RPR and determining the distinguishing facts, one must balance the circumstances

with one's duty to report as discussed above in RPR §7-1-12.3(h). The key is to ensure any and all criticisms are supported by evidence and accepted engineering standards.

While I have attempted to discuss and explain some aspects of your Rules of Professional Responsibility, I must highlight that this article has touched on only approximately 25% of the RPRs found in WV Legislative Rule Title 7, Series 1. There are many more out there and, in addition to the RPRs, there is WV Code §30-13-1 et. seq. that also discusses engineering conduct. As always, the Board staff is here to assist you in your profession and if you would ever need any additional information. In some ways, though, our registered professional engineers here in West Virginia are in the best position to ensure the practice of engineering is held to the highest standard and conducted in the best interests of society, employers and clients, and other registrants.

§7-1-12. Professional Responsibility.

12.1. Knowledge of Rules. All registrants are charged with having knowledge of the Rules of Professional Responsibility. The Board shall notify every registrant and applicant for registration in writing of amendments to the rules. The Rules as amended shall also be published in the roster and on the Board website provided for in W.Va. Code §30-13-12.

12.2. Rules of Professional Responsibility. To comply with the Board's responsibilities, which are to safeguard life, health and property, to promote the public welfare, and to maintain a high standard of integrity and practice, the Board has developed the following Rules of Professional Responsibility set forth in this section. These rules supplement the provisions for professional responsibility prescribed in W.Va. Code §30-13-21 and are binding on every registrant.

- (a) All persons registered in West Virginia are required to be familiar with the W.Va. Code §30-13-1 et seq., this rule, and all applicable laws relating to the practice of engineering. The Rules of Professional Responsibility delineate specific obligations the registrant shall meet. In addition, each registrant is charged with the responsibility of adhering to standards of highest ethical and moral conduct in all aspects of the practice of engineering.

- (b) The practice of engineering is a privilege, as opposed to a right. All registrants shall exercise this privilege by performing services only in the areas of their competence according to current standards of technical competence.
- (c) Registrants shall recognize their responsibility to the public and shall represent themselves before the public only in an objective and truthful manner.
- (d) Registrants shall avoid conflicts of interest and faithfully serve the legitimate interests of their employers, clients, and customers within the limits defined by this rule. Their professional reputation shall be built on the merit of their services, and they shall not compete unfairly with others.

12.3. Registrant's Obligation to Society.

- (a) Registrants, in the performance of their services for clients, employers and customers, shall be cognizant that their first and foremost responsibility is to the public welfare.
- (b) Registrants shall approve and seal only those design documents and surveys that conform to accepted engineering standards and safeguard the life, health, property and welfare of the public.

[CONTINUED ON PAGE 8]

§7-1-12. Professional Responsibility. [CONTINUED]

- (c) Registrants shall notify their employer or client and other appropriate authority when their professional judgment is overruled under circumstances where the life, health, property, welfare of the public is endangered.
- (d) Registrants shall be objective and truthful in professional reports, statements or testimony. They shall include all relevant and pertinent information in the reports, statements or testimony.
- (e) Registrants shall express a professional opinion publicly only when it is founded upon an adequate knowledge of the facts and a competent evaluation of the subject matter.
- (f) Registrants shall issue no statements, criticisms or arguments on technical matters which are inspired or paid for by interested parties, unless they explicitly identify the interested parties on whose behalf they are speaking, and reveal any interest they have in the matters.
- (g) Registrants shall not permit the use of their name or firm name, nor associate in business ventures with, any person or firm which is engaging in fraudulent or dishonest business or professional practices.
- (h) Registrants having knowledge of possible violations of any of the Rules of Professional Responsibility shall provide the Board with information and assistance necessary to the final determination of the violation.
- (f) Registrants shall not accept compensation, financial or otherwise, from more than one party, for services pertaining to the same project, unless the circumstances are fully disclosed and agreed to by all interested parties.
- (g) Registrants shall not solicit or accept a professional contract from a governmental body on which a principal or officer of their organization serves as a member. Conversely, registrants serving as members, advisors, or employees of a governmental body or department, who are the principles or employees of a private concern, shall not participate in decisions with respect to professional services offered or provided by the private concern to the governmental body which they serve unless their participation is approved by the West Virginia Ethics Commission.

12.5. Registrant's Obligation to Other Registrants.

- (a) Registrants shall not falsify or permit misrepresentation of their, or their associates', academic or professional qualifications. They shall not misrepresent or exaggerate their degree of responsibility in prior assignments or the complexity of the assignments. Presentations incident to the solicitation of employment or business shall not misrepresent pertinent facts concerning employers, employees, associates, joint ventures or past accomplishments.
- (b) Registrants shall not offer, give, solicit or receive, either directly or indirectly, any commission, or gift, or other valuable consideration in order to secure work, and shall not make any political contribution with the intent to influence the award of a contract by a public authority.

Board Disciplinary Actions

In meeting its mission of safeguarding life, health and property, and to promote the public welfare, the WV Board actively enforces the statutes and rules that fall within its jurisdiction. Below is a summary of formal complaints that resulted in disciplinary action since the 2014 newsletter. Numerous other investigations were conducted, some resulting in formal complaints which are still pending; some dismissed because the charges were unsubstantiated or considered trivial; and some closed after acceptable corrective action or warning.

The actions below were either a result of a formal hearing resulting in a Board Order or

an informal settlement resulting in a Consent Order. These orders are public records. If you are interested in knowing more about the nature of the complaint, you may request a copy pursuant to the State's Freedom of Information Act. All Final Orders are posted on the Board website.

All civil penalties are deposited in the state's general fund. Administrative costs are made payable to the WV PE Board and are retained by the Board to offset costs incurred in the investigation and complaint resolution efforts. Administrative costs may be waived if the complaint is resolved with a minimum of expense, including staff time.

Disclaimer: Every effort has been made to ensure that the enforcement information is correct; however this information should not be relied upon without verification from the Board office or website. It should be noted that the names of companies and individuals listed may be similar to the names of parties who have not had enforcement actions taken against them. Should you have any specific questions regarding the disciplinary actions noted below, please contact the Board office.

What's the Deal With Using Your Seal?

LEGAL CORNER

DEBRA L. HAMILTON, BOARD COUNSEL & DEPUTY ATTORNEY GENERAL

Although a rather flippant title, it is a serious question. The Rules of Professional Responsibility, and specifically the Rules related to Respondent's Obligation to Employers and Clients, state that licensees "shall not affix their signatures or seals to any plans or documents except in accordance with" West Virginia Engineering Law.¹ 7 CSR 1-12.4(b). Misuse of a West Virginia professional engineering seal is an action that could subject a Respondent to discipline by the Board, including a civil penalty of up to \$5,000.00 for each offense. 7 CSR 1-15.1.

This article primarily addresses West Virginia Engineering Law as it applies when professional engineers affix their seal to work that was, in part, performed by others. It does not attempt to thoroughly answer the question of when a seal must be applied since that may be dictated by custom and practice or other applicable law.² However, the Board has a pending complaint alleging a seal violation due to an unsealed final drawing (see C2015-06), so that is an important question as well.

Before addressing the primary topic, let's be reminded that we are talking here about your **West Virginia** PE seal. You have a West Virginia seal because you have a license that grants you the right to practice **in West Virginia**. W. Va. Code § 30-13-16(a) & 7 CSR 1-6.2(b). Therefore, your West Virginia seal should be used only when the project or client (customer) is located in West Virginia and not on engineering work for clients in other jurisdictions.

There are a couple of egregious examples of a West Virginia seal being placed on projects located in another state. Both resulted in disciplinary action for misuse of seal. See C2004-7 and C2008-14, both of which also found an intent to deceive or defraud the public.³ Just using your West Virginia seal outside of this State has also been grounds for disciplinary action because your West Virginia seal is intended only for use in West Virginia; see C2013-01. If your project is in another state or your custom-engineered product is being shipped to or for use in another state, you must look to the laws of that state regarding whether a seal is

required and, if so, what you must do to be able to legally affix a seal. Using your West Virginia seal on out-of-state projects may result in disciplinary action by the Board.

While it should be obvious, you likewise cannot use another jurisdiction's seal on work for a client in West Virginia. There are several recent examples of disciplinary action resulting from this violation; see C2014-03, C2014-14 and C2014-20. Note those Orders do not include the violation of "misuse of seal" since the WV PE Board only takes disciplinary action for misuse of a **West Virginia** seal. However, it still constitutes grounds for disciplinary action by the WV PE Board, and the Board would likely contact the licensing board in the jurisdiction where the seal was issued in the event that board wants to take action for the use of its seal on engineering work which should have had a West Virginia seal.

While it should be obvious, you likewise cannot use another jurisdiction's seal on work for a client in West Virginia. There are several recent examples of disciplinary action resulting from this violation.

Back to the main topic – when may you seal work done in whole or in part by others? There is no way to provide a definitive answer since it is a fact-based question that also involves the Professional Engineers' Rules of Professional Responsibility in terms of when a particular PE is competent to seal a document. However, knowing some of the provisions that pertain to this issue may prove a helpful guide in determining what a West Virginia PE should consider before placing his or her seal on work done by others.

W. Va. Code §30-13-16(c) and 7 CSR 1-7.3(a) state that a PE's seal indicates that the work was done by the PE or under his or her "complete direction and control." W. Va. Code §30-13-16(c) goes on to discuss what is involved when a West Virginia professional engineer checks the work of an out-of-state PE. It requires the West Virginia PE to "completely check and have complete dominion and control of the design" which

"includes possession of the sealed and signed reproducible construction drawings with complete signed and sealed design calculations indicating all changes in design." This language is repeated in 7 CSR 1-7.3(g).

So - is there a difference between "complete direction and control" and "complete dominion and control?" Not really. In July of 2011, an interpretive rule of the Board went into effect that extended and updated §30-13-16(c) so that it was clear that a PE's duties when checking another engineer's work was the same, regardless of whether the engineer performing the original work was licensed in this State or not. See 7 CSR 3-2. [apps.sos.wv.gov/adlaw/csr/ruleview.aspx?document=6755]

W. Va. Code §30-13-21(a)(10) makes it unlawful to sign or affix the seal (or permit

the use of the seal) "to any specifications, reports, drawings, plans, design information, construction documents or calculations or revisions which have not been prepared or completely checked by the professional engineer or under the professional engineer's direct supervision and control." So here is yet another phrasing of the prerequisites to sealing work done by someone else: the professional engineer sealing the work must completely check the work or directly supervise and control the work. Again, different wording, similar requirement.

The phrases "complete direction," "complete dominion" and "direct supervision" all indicate that a professional engineer does not always have to do the work, and W. Va. Code §30-13-24(c) plainly states this. WV Engineering Law does not prevent an employee or subordinate from doing engineering work under a person⁴ lawfully practicing engineering **so long as the work**

does not include final engineering designs or decisions and is done under the direct supervision of and verified by "a PE or person otherwise practicing lawfully." The interpretive rule discussed above does not address sealing the work of an employee or subordinate, but the same kinds of terms are used to indicate the professional engineer's substantial involvement in the work prior to the placement of a PE seal on the work.

Several of the sections relating to sealing another's work are discussed in the Consent Order in C2013-03. In that matter, which involved the sealing of employees' work, it was clear from the facts that the Respondent did not directly supervise the work, did not verify the work, and in some instances did not even see the work before his seal was applied to reports which, because of the seal, purported to be engineering reports. The presence of the engineering seal on reports prepared by an unlicensed employee but which were not verified by the PE had the potential to mislead or deceive the public. A substantial fine was agreed to for Respondent's misuse of seal and for violations of the Rules of

Professional Responsibility, including 7 CSR 1-12.4(b) which specifically addresses seals.

So, what constitutes compliance with WV Engineering Law when sealing another's work? WV engineer law does not attempt to define the various words or phrases. What is meant by "complete direction and control" or "complete dominion and control" or "direct supervision" is not spelled out. Similarly, what is involved in *verifying* someone else's work? These terms likely would be given their common-sense, dictionary meanings if the circumstances of the sealing of the work became a question of fact.

Black's Law Dictionary is a dictionary of legal terms, and "verification" is such a term. Among other uses of the term, *Black's* offers the following general definition: "Confirmation of correctness, truth, or authenticity, by affidavit, oath, or deposition." An earlier version of *Black's* gave examples of a verified complaint and an accountant's process of substantiating entries in books of account, but I found nothing illustrative of "verification" in an engineering context.

Black's also provides some definitions of the term "verified":

- When used in a statute, "verified" ordinarily imports a verity attested by the sanctity of an oath. It is frequently used interchangeably with 'sworn' ...
- To prove to be true; to confirm or establish the truth or truthfulness of; to check or test the accuracy or exactness of; to authenticate.

The word "sanctity" is an apt term when used in connection with your PE seal. You are sanctioning that document, and you can be sanctioned if you misuse your seal. Before you place your seal on any document, or allow an employee or subordinate to do so, you need to have done the work necessary to certify that document. Depending on the circumstances, the work needs to have had your supervision, direction, complete dominion and control, complete check, and/or verification. Your seal and signature is much more than your seal of approval; it is your work, your liability and your reputation.

¹ The statutes can be found in Chapter 30, Article 13 of the W. Va. Code, cited as W. Va. Code §30-13-1 *et. seq.*, and the Board's legislative rules are in Series 7 of the Code of State Regulations (CSR). The rules are accessible from the Secretary of State's website [apps.sos.wv.gov/adlaw/csr/]. Here, rules are cited as 7 CSR ___, but are sometimes cited as W. Va. Code R. §7-__.

² However, W. Va. Code §30-13-16(c) [Certificates and Seals] and 7 CSR 1-1-7.3(a) [Seal on Documents] both require the seal and signature to appear on the first or title page of all final and/or record documents of specifications, reports, drawings, plans, design information and calculations presented to a client or any public or governmental agency.

³ Orders related to disciplinary actions can be accessed at www.wvpebd.org

⁴ The section uses the term "person" because it relates not only to PEs, but unlicensed persons who are doing engineering work pursuant to the industrial exemption contained in the same subsection.

Important Changes To NCEES Exams

2015 NCEES PE EXAM CHANGES

April 2015 Exam Changes

- Structural Engineering (SE) 16-hour – The SE 16-hour exam will have revised design standards starting in April 2015.
- PE Civil – The PE Civil exam will have revised specifications starting in April 2015. There will also be new design standards for the Civil Construction, Geotechnical, Structural, and Transportation modules starting in April 2015.
- PE Agricultural and Biological Engineering – The PE Agricultural and Biological Engineering exam will have new specifications starting in April 2015. It has been revised and renamed the PE Agricultural and Biological Engineering exam and will be administered starting in April 2015 and in every spring administration thereafter.

October 2015 Exam Changes

- PE Metallurgical and Materials – The PE Metallurgical and Materials exam will have revised specifications starting in October 2015. The specifications are posted on the NCEES website. Since the last

administration with the old specifications has already occurred and the new specifications are already posted on our website, these specifications can be shared.

Exam specifications indicate knowledge areas to be tested and their relative weights of emphasis. As the developer of the exams used for engineering licensure in the United States, NCEES periodically conducts surveys of licensed engineers working in industry, government, private practice, and academia to gather information about the knowledge and skills required of professionals in a particular discipline. NCEES uses the results to update its exam specifications.

"Our licensing exams need to reflect current professional practice, and these surveys help us determine what an engineer intern with four years of experience should be expected to know to protect the public," said Tim Miller, P.E., the director of exam services at NCEES.

All new and existing exam specifications can be found on the NCEES website at www.ncees.org

engineers and surveyors

The NCEES pages contain an overview of recent news releases received from the National Council of Examiners for Engineering and Surveying (NCEES), as well as NCEES Licensure Exchange, concerning items that may be of interest to our engineering community. Some of these articles may have been adapted to fit the space allocated. For more information on any of these updates, or to review the full news releases, simply visit the NCEES website at www.ncees.org.

NCEES Annual Report and New NCEES Squared Publication

NCEES recently released their 2014 Annual Report. The NCEES annual report highlights the Council's leadership, mission, initiatives, and financial activities. It also provides an overview of the organization's accomplishments and growth over the past year. In addition, the latest NCEES publication, NCEES Squared, focuses on statistics ... what percentage of NCEES exam development volunteers are women, what is the average age of a PE examinee, how many people use the NCEES Records program, etc. If you are interested in the numbers (of course you are interested ... you are an engineer!), you may view these documents as well as an interactive version of the annual report on the NCEES website at www.ncees.org.

Multistate and International Practice

Because licensure is regulated at the state level, a professional engineer or surveyor must be licensed separately in every state in which he or she practices. Navigating the various state application processes and understanding the individual state laws is no easy task. To learn about the licensure requirements in a particular state, you can contact the appropriate licensing board or visit the NCEES website to review individual Board profiles at www.ncees.org/licensing-boards. The Board Profile Survey is a great tool built on common questions and answers and other information provided by each of the individual licensing jurisdictions regarding the following:

- Licensure Requirements for individuals/firms
- Number of active engineers/surveyors
- General information (rosters, fees, applications)
- Application basics
- Practice and enforcement related matters
- Renewal and reinstatement requirements

The NCEES Records Program is a popular service that assists licensees who need to practice in multiple states or territories. It provides a means of storing and transmitting your professional records – such as transcripts, exam results, references and employment verifications – in order to apply for licensure in additional states or territories. Having an NCEES Record often allows for faster turnaround for competency licensure applications. To see if this program would be useful to you, learn more at www.ncees.org/records.

Regarding international practice, NCEES also provides a service that assists licensed engineers seeking recognition to practice in foreign countries. For more information on the NCEES International Registry, please visit www.ncees.org/records/international-registry.

About NCEES

The NCEES Council's members are the engineering and surveying licensure boards from all 50 states, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands, representing 69 member licensing boards total. NCEES is headquartered in Clemson, SC.

WHO THEY ARE

The National Council of Examiners for Engineering and Surveying (NCEES) is a national nonprofit organization dedicated to advancing professional licensure for engineers and surveyors.

Professionally licensed engineers and surveyors have met specific qualifications in education, work experience, and exams and are obligated to work in a manner that safeguards the health, safety and welfare of the public.

WHAT THEY DO

NCEES facilitates mobility for professional engineers and surveyors in the United States by providing services to its member licensing boards and licensees. These services promote uniformity in licensure laws throughout the country, making it easier for engineers and surveyors to become licensed.

EXAM DEVELOPMENT

Licensed engineers and surveyors volunteer their time and expertise to the exam development process by coming to NCEES headquarters to write and evaluate exam questions. In FY2014, NCEES welcomed a total of **745** volunteers at **54** exam development meetings. This represents approximately **23,056** hours spent developing exam content for **8** fundamental exams and **26** professional exams.

! Red Flags

Watch out for these issues:

- Architectural sheets sealed by an engineer
- Engineering sheets sealed by an architect
- Plans sealed by an unlicensed person, architect or engineer
- Plans sealed by an engineer of an unauthorized firm (one without a COA)
- Incomplete documents sealed without a disclaimer
- Plans that have not been sealed, signed (dated) by the licensee(s)
- Prototypical, standard plans that do not bear the seal of the WV licensee and disclaimer
- Seals that appear to be cut and pasted
- Contact person is not the licensee or it is difficult to contact the licensee
- Plans, details, letters, reports, etc. do not appear to apply to the project
- Plans have numerous or serious code violations
- Non-dated revisions
- Revisions or changes missing seal, signature (date)
- Plans which do not list the name of the architect or engineer involved and the name of his/her firm.

? What to do?

- Question the professional as to circumstances and qualifications
- Get the issue corrected
- Reject the documents
- Contact the appropriate licensing board
- File a complaint with the appropriate licensing board

e Engineering Addendum:

Are the services of a registered professional engineer required for single family residential structures?

Single family residences do not normally require the design services of professional (structural) engineers except for some large custom designed homes where the owner requests the services or the spans are too large for typical code-specified framing to work. Generally the only times a structural engineer will become involved in a single family residence are as follows:

- Where there is a problem with the foundation or framing of the house, such as storm damage, soil movements, or unusual deflections and damages in the architectural finishes.
- When an existing house is being sold and the mortgage company is looking for someone to identify and describe the various structural movements and damages that have occurred in the structure, as well as provide some recommendations of what should be done to eliminate the problems.
- When the design of the house involves a structural system which is outside of the typical structural framing and foundation systems specified in the residential building code or when the building code requires engineering services.
